MD. GOLAM MORSHED

+91 8327476215 ◇ Berhampore, West Bengal

mdgolam.bhp@gmail.com◇ *linkedin.com/md-golam-morshed*◇ github

OBJECTIVE

I am a dedicated software engineer with a strong background in software development, data structures, algorithms, and system design. I possess practical knowledge of programming languages like Java, Python and C++ , along with modern web technologies and databases. I thrive on solving real-world challenges through technology and am eager to learn and apply innovative solutions within dynamic teams.

EDUCATION

Master of Technology (MTECH), Netaji Subhash Engineering College 2025 - 2027
Computer Science and Engineering

Bachelor of Technology (BTECH), Future Institute of Technology 2021 - 2025
Computer Science and Engineering

SKILLS

Programming Languages	Python, Java, C++, SQL, HTML, CSS.
Technical Skills	Machine Learning, Artificial Intelligence, Data Structures and Algorithms, Object Oriented Programming, Database Management System, Cybersecurity.
Soft Skills	Leadership, Critical thinking, Flexibility, Time Management
Developing Tools	VS Code, MySQL, Git, Render, Kaggle, MS Excel.

EXPERIENCE

Technical Internship Feb,2024-April,2024
Ardent Computech Pvt Ltd *Kolkata, West Bengal*

- Developed a full-stack product-based e-commerce platform with 20+ responsive product pages, secure authentication, shopping cart, and payment workflow.
- Built REST APIs for product catalog, user profile, and order processing with CRUD functionality.

PROJECTS

DUPLICATE QUESTION PAIR DETECTION USING MACHINE LEARNING

- Developed a machine learning-based approach to detect duplicate question pairs using a Random Forest classifier.
- Trained the model on a publicly available dataset leveraging engineered features such as textual similarity metrics to determine semantic equivalence between question pairs.
- Deployed the model using FastAPI as the backend server, exposing an API for real-time predictions.

RURAL HEALTH INTAKE PRE-TRIAGE VOICE ASSISTANT (AAROGYAVOICE)

- Engineered an AI-powered voice assistant and pre-triage web platform to streamline patient intake, initial symptom collection and healthcare accessibility.
- Integrated speech recognition and interaction workflows to support remote users with seamless voice commands.
- Successfully deployed and optimized the full-stack application on Render with a responsive frontend and reliable backend architecture**.**

FULL STACK DEVELOPMENT WITH MICROSOFT .NET AND SQL SERVER CLOUD BASED (HUTCH)

- Designed and built Hutch, a product-based e-commerce platform offering customers a seamless and personalized online shopping experience.
- Incorporated advanced functionalities such as product filtration, search auto-suggestion and image uploading to the database, ensuring an efficient user journey.

CERTIFICATIONS

- Google Cybersecurity Professional Certification
- AI for Business Professionals (HP)
- Mastercard Cybersecurity
- TATA Cybersecurity Analyst
- Deloitte Cybersecurity

ACHIEVEMENTS ANDS RESPONSIBILITIES

- Led a cross-functional team of 5 to successfully design, document and present the NLP machine learning model.
